## MORLIN PITTSBURGH ELECTRIC LOCK HAMMER

### HEAVY DUTY MODEL 5400 ELECTRIC "PITTSBURGH LOCK" HAMMER

The PERFECT TOOL  
for Closing "Pittsburgh Locks"

- **Model 5400** - The **MORLIN** 5400 Hammer speeds up and takes the work out of the only tedious, costly, and time-consuming job of fabricating duct work- *closing the "seam."* This *new MORLIN* tool breezes along at speeds of 15 feet per minute on commonly used gauges. Actually, it can save half of a man's time in making ducts, and do a better job.

- **Ends Hand Hammering . . .**  
Just a couple of taps at the center and ends of a standard length duct to secure the lock . . . then the **MORLIN** Pittsburgh Lock Hammer do all the work.
- **Versatile . . .**  
Handles 30 to 22 gauge (no adjustment required). For straight runs, inside or outside radius . . . use it in the shop or on the job.
- **Perfect Balance . . .**  
Weight rests on the work . . . position of handle affords positive control and balance . . . guides easily along the seam.
- **Powerful . . .**  
**HEAVY-DUTY BUILT** 115V AC motor . . . more than enough power for any job.
- **Rugged . . .**  
Sturdily built for heavy-duty use . . . ball and roller bearings throughout.

- **Warranty . . .**  
A MORLIN EXCLUSIVE ONE YEAR  
**ALL PARTS - ALL LABOR**  
**PERIOD.**
